## Facultad de Ingeniería Mecánica y Eléctrica

### Unidad Torreón

Subject	Semiconductor physics	Group	4A
Degree	Electrical engineering	Date	27/01/2017
Exam / Homework	Homework 1: Introduction to semiconductors	Registration #	<b>15128916</b>
Professor's name	Suresh Kumar Gadi	Marks Obtained	____ / 10
Student's name	<b>PEDRO FRAIRE SOLÍS</b>		

## Instructions

1. The student should submit the homework on or before the due date. (LATE SUBMISSION = 0 MARKS)
2. Answers should be hand written on a A4 or a letter size bond papers. (20% of the marks obtained will be reduced)
3. The student should print his/her corresponding question-paper and staple it along with his/her answer sheets. (20% of the marks obtained will be reduced)
4. In the calculations, the student should maintain at least a precision of 3 decimal places with a correct rounding. (20% of the marks obtained will be reduced)

## Questions

1. List all the elements with: (3 points)
  - (a) four valance electrons.
  - (b) three valance electrons.
  - (c) five valance electrons.
2. Beyond which atomic number the elements show the property of radioactive decay (or nuclear decay)? (1 points)
3. What are the different allotropes of the carbon element? (3 points)
4. Draw and explain the monocrystalline silicon structure. (3 point)
